Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/534,122	Applicant(s) SUGUTA ET AL.	
	Examiner Peter Agustin	Art Unit 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 May 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. This application is a national stage entry (371) of PCT/JP04/10995, filed July 26, 2004.
2. Claims 1-6 are currently pending.

Election/Restrictions

3. Applicant's election of Species (a), Figures 1-5, claims 1 & 4-6, in the reply filed on April 8, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
4. Claims 2 & 3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 8, 2008.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

6. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

7. Figures 5-7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37

CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1 & 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 2 recites "audio data in compliance with a *predetermined standard*". The term "standard" is vague and indefinite. What is considered as "standard" changes over time, and so will the scope of the claim.

Claims 4-6 are dependent upon claim 1 and also recite "predetermined standard".

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1 & 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekii (US 6,275,452).

In regard to claim 1, Sekii discloses a digital audio device (Figure 1) for outputting information recorded on a recording medium (2) as audio data in compliance with a predetermined standard (column 4, lines 40-47: “Digital Audio Interface Standards”), comprising: a track boundary detection section for detecting an audio track boundary based on information recorded on the recording medium (column 7, lines 14-17: “start address”, “start of a track in the audio area”); a track boundary data production section for producing track boundary data indicating the audio track boundary detected by the track boundary detection section (column 7, lines 17-21: “time code”, “absolute time”); and an auxiliary information production section for producing auxiliary information (column 5, lines 51-57: “generates sub-data”) by adding a control code as specified in the predetermined standard to the track boundary data produced by the track boundary data production section, wherein audio data obtained from the recording medium is output with the auxiliary information produced by the auxiliary information production section being superimposed thereon (abstract: “additional data accompanying the main data”).

In regard to claim 4, Sekii discloses that the digital audio device comprises an audio data reproduction section (Figure 1, element 7) for reproducing, from information recorded on the recording medium, audio data in compliance with the predetermined standard; and the audio data reproduction section receives the auxiliary information (note “additional information” and “sub-data”) produced by the auxiliary information production section and superimposes the auxiliary information on the reproduced audio data (note “audio signal”).

Claims 5 & 6 have limitations similar to those of claim 1 and are rejected on the same grounds.

Citation of Relevant Prior Art

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ueki (US 7,020,067), Kawamura et al. (US 6,473,374), Hong et al. (US 6,625,093), and Watanabe et al. (US 6,882,608) are all pertinent to applicant's disclosure of detecting a track boundary and processing of auxiliary information.

Contact Information

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Agustin whose telephone number is (571) 272-7567. The examiner can normally be reached on Monday-Thursday 8:30 AM-6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild can be reached on (571) 272-4090. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
